

A Project Report
On
“PREMIER SPORTS WEBSITE”
by:
PRATHAM M

Certificate

This to certify that PRATHAM.M have successfully completed the project titled “PREMIER SPORTS WEBSITE” at St. Joseph’s College (Autonomous) Bachelor of Science (Computer Science) of Bengaluru City University, Bengaluru.

ACKNOWLEDGEMENT:

In completing this graduate project, we have been fortunate to have help, support and encouragement from several people.

We would like to thank Prof. Joy kiran, our project advisor, for guiding us through each and every step of the process with knowledge and support, thank you for your advice, guidance and assistance.

I would like to thank my Project Partners for their help and coordination throughout the project.

ABSTRACT:

Premier Sports is an E-commerce website based on Sports Equipment. We provide sports attire to customers in need. All types of Products related to sports is available such as bat,ball, jersey,track suits and many more. We have created a website which provide best sports attires for every sports enthusiasts out there. The website will allow customers to browse and buy the best fit for them. A person who needs any type of sports product can just come to our website and buy. This website is made simpler and easy to use because we don't want to make feel hard to use the website for the customer. This website is made to make the customers to feel free while using the website. Starting from home page till the end payment Page everything is made step by step and is done systematically. The website makes the customer happy while browsing the products. Also we provide the fastest delivery to the customers, so the waiting time of customer will be reduced.

INTRODUCTION:

The Online E-Commerce Sports website enables vendor to setup shops, customers to browse through the website and see the products. The customer can select the required product and add that to cart. To buy the Product customer must be registered and create their account and make payment. We provide the fast delivery to the customer. This website also aims towards the people who do not want to visit the shops to buy the product, those people can book their required products online which will be delivered to their door step.

The aim of this project is to develop a general-purpose e-commerce store where customers can browse the catalog and select product of interest from the comfort of home through the internet, the selected items will be collected in shopping cart. At checkout time, the item in the shopping cart will be presented as an order, at that time you will be redirected to a payment page and more information will be asked to complete the transaction such as the customer's shipping address, billing address and payment information such as credit card number and finally an email notification will be sent to customer's email id ensuring their order has been placed successfully. Our objective is to provide a robust, simple, user-friendly website to meet the customer needs. The Main Purpose of this website is to reduce manual work of a customer. The user should be familiar with the internet, shopping websites and transactions etc to use this website. If Customers want to contact us there is a phone number also given to them or they can write to us using the contact page.

STUDY OF EXISTING SYSTEM:

Currently there are many websites which offer sports attires through different platforms of online shopping but very fewer websites which only concentrates on sports attires and sports products. In those few website which are concentrating on E-Commerce ours website is also one among them. This website is built based on present technology.

STUDY OF THE PROPOSED SYSTEM:

The website proposed by us will allow customers to buy sports attire all at one place. The customers can buy all the products related to sports here. In todays's generation there is huge number of E-commerece websites for customers to buy the product. But we are providing the products at best quality products with best price a customer can offord to the products. We are trying to help the people to buy the products online who are not having time to go to shops and buy the products.

SYSTEM REQUIREMENTS:

Hardware requirements:

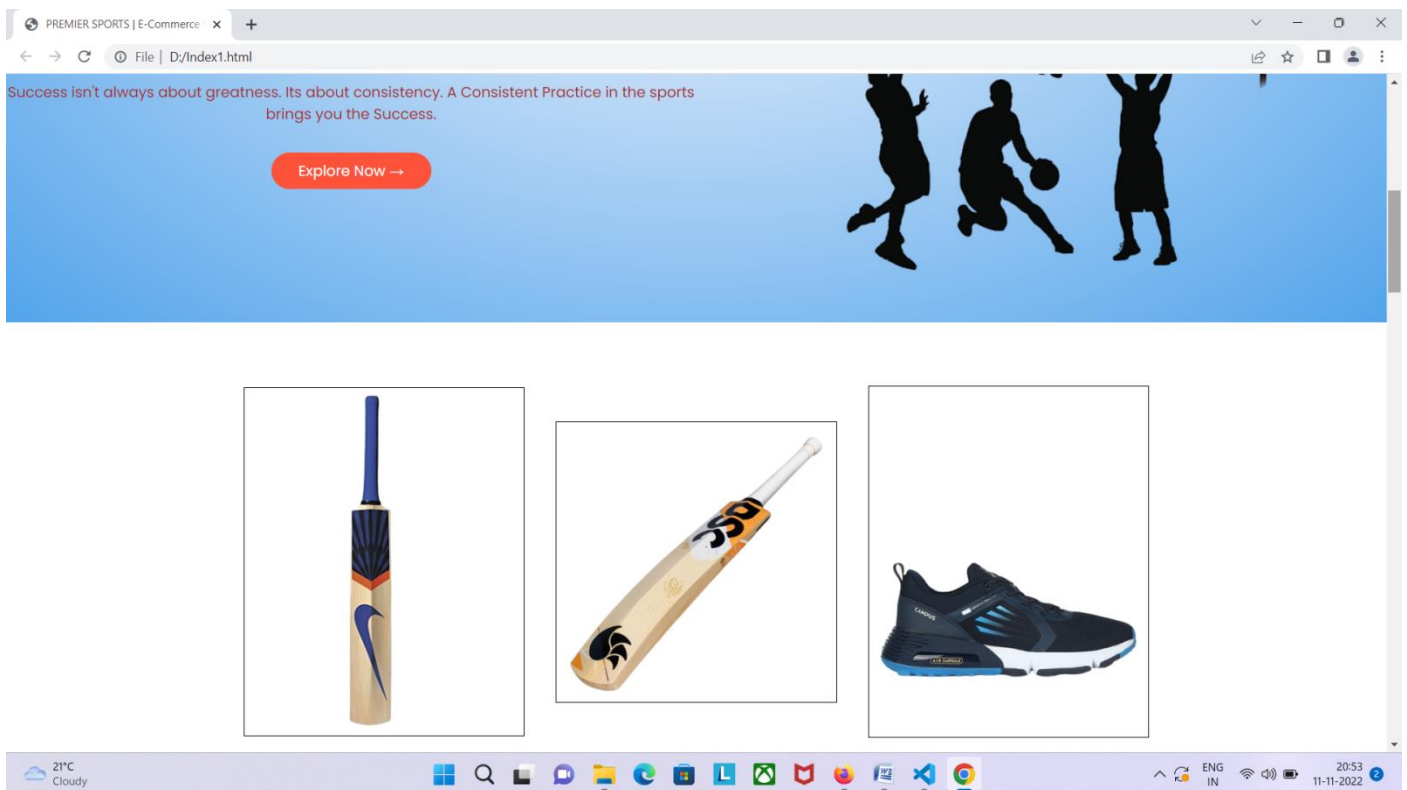

- | | |
|----------------------|--------------------------|
| • Processor(CPU) | Intel CORE i3 |
| • RAM | A minimum of 2GB |
| • Hard Disk | 20GB |
| • Monitor Resolution | 1024 X 768 or higher |
| • Network speed | 4Mbps or higher Software |

Requirements:

- | | |
|-------------------------|---|
| • Programming languages | HTML 5(Front End), CSS (Styling),JavaScript |
| • Coding Platform | Visual Studio Code, Atom |
| • Browsers Supported | Google, Edge, Chrome,opera |
| • Operating system | Windows 7/8/10/11 |

CONCLUSION

With the improvement of technology, there has been a whole wide change in the way information is passed onto us. Not just information the face of business has also been changed over years. They have embraced the new technology and are coming up with a lot of innovative idea.

The approval to deliver process ensures that we have a proper Plan, Resources, Processors and people in place for quality delivery in time.

The main idea of our “SPORTS WEBSITE “project was one to successfully acquire a simple, static webpage for helping the customers to buy the sports products easily and second to develop an ease to use frontend using languages HTML, CSS, and java script.

We have learnt how to design and type codes using HTML, CSS, JAVASCRIPT, this was a good experience for our team to gather different ideas from individuals and put them in a single website. We also learned how to work as a team for a given project, how to agree on an idea and how to implement it. So we have learnt team work and understood how to share the idea with each other.
